

Weather Alerts: Audible Programming

Below is the list of audible alerts that are programmed in the County-issued Weather Radios, Model WR120. All alerts will display on the device, but only those with status “On” are audible when triggered. Alerts with “Default” will not display on the screen because there is no option to disable.

Weather radios distributed through this program are prioritized for residents living in high fire hazard areas where cellphones coverage is limited, and who are otherwise not able to obtain one for their own personal use. Weather radios available through the LA County distribution program are branded with the LA County logo and remain the property of the County. Adaptive devices for residents who are hard of hearing are available by request.

†Only present on some Midlands models.
